Continuing Education Units

An added benefit of attending PowerSchool University is your opportunity to earn Continuing Education Units (CEUs) for the PowerSchool trainer-led classes you attend. Given the rapidly changing market and improvements in technology, professional development is a must.

Why apply the work you do at PSU towards CEUs? Here's just a few reasons:

- Hones and improves your skillsets
- Increases your chances for promotion
- Strengthens your ability to make a career transition
- Helps you grow as an individual
- Provides networking opportunities

How to Earn CEUs

On your PSU registration form, check **I would like to participate in Continuing Education Units (CEUs)**. When at an onsite conference, be sure to scan your badge at the door for each CEU eligible course as attendance is required.

If training online, attendance is taken for each instructor-led session you attend. As you attend online sessions, be sure to log in to the Zoom meeting with your full name as your display name.

Once the event is over, you'll be provided a link to register for CEU credits.

CEU Eligibility

To earn 1 credit, attend a minimum of 12 hours of trainer-led sessions at PowerSchool University. To earn 2 credits, attend a minimum of 24 hours of trainer-led sessions at PowerSchool University.

After the conference, complete an additional 3-6 hours of learning using resources available in PowerSchool's curriculum repository, Customer Education Campus.
