

PowerSchool SIS: Certification – Database Management

As part of the two certification exams that come with your event tuition, you are eligible to take this 3-hour class at PSU. To participate in this certification, check the box to take the Database Management certification on your registration form. After the event, you will receive a link to the online exam. Once you pass, you will receive a certification badge that notifies others you have successfully completed the certification.

Certification Benefits

Your event experience includes the opportunity to learn from expert trainers and network with other PowerSchool learners. Take the Database Management certification to learn how to extract and modify data in PowerSchool SIS. In this certification, participants will learn how to access and update the database directly using tools such as the Student Field Value and Staff Field Value functions, Direct Database Export (DDE), and Direct Database Access (DDA).

Additionally, seeking Database Management certification offers the following benefits:

- Validates your training experience
- Certifies you as a database management expert within your school district
- Qualifies you to take the exam at no additional cost as exams for two certifications are included in your PSU registration fee

Exam Preparation

In order to be properly prepared for the exam:

- Attend the PowerSchool SIS: Certification – Database Management class
- Review the curriculum in the Curriculum Connection learning path on Customer Education Campus
- Practice using the functionality
