
Technical Coordinators, Technical Support Staff, PowerSchool Admins

PSU has something for everyone!

Learn how to maximize your ROI and customize PowerSchool to fit your school's needs without sacrificing security or risking data loss.

What can PSU offer technology experts?

Establish security groups and user access roles to define overall security access, and configure field level security settings and user security settings to define users' access. Discover how to customize PowerSchool using database extensions to add fields, incorporate field validation, and create new pages with tabbed content. Learn how to use Oracle's Application Express (APEX) tool to build and publish your own Enterprise Reporting reports, and access the entire PowerSchool database from APEX, including your custom fields and database extensions. Explore powerful, interactive data analytic reports to get the real-time student information you need to make informed decisions.

Choose from our courses in Enterprise Reporting, Security Settings and Customizations including HTML, database extensions, SQL and JavaScript to complete your schedule at PSU! The following are just a few courses to try in 2018:

- **System Administrator: Security Settings**
- **Enterprise Reporting for APEX Report Builders**
- **Customizations 301: Using SQL on Custom Pages**
- **Customizations 402: Using JavaScript to Automate Tasks**

For more courses and complete descriptions, please see the Course Catalog for the event of your choice.
