Sustaining Great Practice:
Going Viral with Innovative Teaching and Learning

Effective teaching practices flourish under the right conditions! Managing those conditions is at the heart of great leadership. Learn ways to manage the change process, work with resistant teachers, and examine surprising facts about professional development.

Participants will learn ways to improve data driven dialogue that leads to realistic, actionable steps while building a positive school culture of learning. Learning for students, teachers, and leaders! Collectively, these skills help building leaders maximize professional development and ensure innovative teaching practices go viral!
