

## Station 3: After the Storm

*The goal of this station is to apply understanding of the consequences of natural disasters to help determine how they affect communities.*

**Review student sheet before starting station activities.**

### Step 1: Examine the Images

- As a group, examine the four images at the table.

### Step 2: Analyze the Images

- Individually, choose two images to analyze more deeply.
- For each image, complete one organizer on the Student Sheet
  - Record any emotional effects you see.
  - Record any physical damages you see.
  - Examine your observations and determine which are explicitly stated and which are inferences.
  - Categorize your observations accordingly on the organizer.

### Step 3: Discuss the Findings

- Share your observations with the members of your group. Discuss both the emotional effects and physical damages you identified and identify why they stood out to you.

### Step 4: Draw Conclusions

- Use your notes and observations to answer the guiding question on the back of the organizer.

### Step 5: Data Collection Sheet

- Use your Data Collection Sheet to note how this station helped you answer any of the essential questions:
  - How do we prepare for disasters?
  - What are some emotional, physical, mental, and financial effects of disasters?
  - What role do human strength and resilience play in recovering from disasters?
