Type	Description
Reset Filters	Select and clear filter criteria to further refine search results. You can also clear all filters to start a new search.
Material Types	Choose one or many material types: Curricular Units Instructional Units Lesson Plans Assessments Resources **NOTE:** This option is only available for materials results.

Intended Audience	View material results for resources by the intended target audience. For Educators - results include resources that are only available to teachers For Students - results include resources that are only available to students **TIP:** When searching for materials to assign to students, select Resources and For Students to quickly locate materials that are ready to assign to your students. **NOTE:** This option is only available for materials results.
Subject	Select a subject.
Grade	Select one or many grades to filter the list.
Publisher	Select the publisher of the material. NOTE: This option is only available for materials and curriculum results.
Institutions	Select the filters for an entire district or state. For state-created curriculum, teachers and administrators can view only curriculum that has been scheduled by a district. District-created materials that have been promoted to the state materials bank are available to all school districts within the state institution. All District materials are those that have been promoted to the all-district materials bank and are available to all school districts within the state institution without needing state approval first. NOTE: This option is only available for materials and curriculum results.
