

# Completing Self Reflections Quick Reference Card

Self-reflection is a process by which teachers assess the effectiveness of their instructional planning, lesson implementation, content knowledge, beliefs, and dispositions for the purpose of self-improvement. When teachers use data to reflect on what worked, what did not work, and what types of changes they might make to be more successful, the likelihood of knowing how to improve increases dramatically. Evidence suggests that self-reflection is a critical component of the evaluation process. (Airason & Gullickson, 2006; Tucker, Stronge, & Gareis, 2002).

The goal of self-reflection is to improve teaching and learning through ongoing thinking on how professional practices impact student and teacher learning. The attainment of this goal is facilitated through the development of a professional growth plan that either develops or hones professional practices and leadership skills.
