## Quick Reference Card

### Schoolnet: Creating and Using Rubrics

In Schoolnet, rubrics are guidelines used to evaluate a student's performance on an open response item. Rubrics provide expectations of quality around a task to delineate consistent criteria for grading. Create and reuse these rubrics on multiple items and multiple assessments.

Rubrics can be single- or multi-dimensional. Use the rubric templates to select layout and scoring options.

Rubrics follow the same user permission and approval rules as items. Unless permitted otherwise, teachers can create rubrics for their tests only, while test administrators can determine sharing options.

### Create a Rubric

When creating new rubrics, you must complete all required fields.

To create a new rubric:

1. Roll your cursor over Assessment Admin and click **Create**
2. Click **Create a Rubric**
3. Choose a grouping option:

If you select Disabled, you'll remove the ability to group quality, trait, or skill into groups

Click **Enabled** to provide the ability to group quality, trait, or skill into groups and scoring for each row or group

When you enable the grouping option, decide how the rubric will be scored. You can score the rubric at the header level (grouped level) or on the skill level (row level).

By scoring at the skill level, users can score using multiple standards (one per skill). By scoring at the header level, users can score using one standard for the entire group. Change the layout of the rubric at any point while you create the rubric.

The screenshot shows two sections of a form. The first section is labeled 'Grouping' and has three radio button options: 'Disabled', 'Enabled', and 'On groups of these'. The 'Enabled' option is selected. The second section is labeled 'Score Entry' and has two radio button options: 'On each quality, trait, or skill' and 'On groups of these'. The 'On each quality, trait, or skill' option is selected.

4. If Grouping is enabled, select a score entry to determine where standards are aligned—either at the row or group level
5. Enter a name for the rubric

It may be useful to include the standard in the name.

6. Select a subject and grade range
7. Choose the rubric scale for measurement, point value, or level

This measurement will be displayed when the rubric is displayed.

8. If applicable, click **View optional fields** to enter keywords or the publisher
9. Add and remove rows, columns, and group headers as needed

You can specify up to 15 qualities, traits, or skills and up to 10 performance levels by which to measure students.

# Schoolnet: Creating and Using Rubrics

10. For each row, click **Select Standard**, choose a standard, and click **Done**

Note that the standard, grade level, and subject of a rubric will override those of an existing item to which the rubric is attached.

11. In the fields indicated, enter a quality, skill, or trait

12. For each column, provide a performance label

If appropriate, modify the numbers to start at a zero level.

13. For each label and skill, enter a description

14. Click **Save**

15. Depending on your role, you may see an additional screen to select other users who can view the rubric

## Locate and Edit a Rubric

When editing a rubric, you can make changes to rubric properties, rubric levels, and weights. The changes are reflected in all references to the rubric, with the exception of items on scheduled tests.

To locate a rubric:

1. Roll your cursor over Assessment Admin and click **Find Item, Passage or Rubric**
2. In the Rubrics tab, filter by any combination of subject, grade, standard, and creator

3. Click **View Results**

4. Next to the rubric to edit, click **Edit**

If you don't see the Edit, Copy, or Delete links, you do not have permission to perform these functions.

5. Make any changes and then click **Save**

Or, to remove the rubric, click **Delete**. To locate deleted rubrics, you must perform an advanced rubric search.

# Schoolnet: Creating and Using Rubrics

## Copy a Rubric

Although each rubric only supports one standard, it is easy to copy an existing rubric and change the standard. Copying a rubric comes in handy when a rubric is needed for another standard, but it shares the same or similar levels and descriptions.

To copy a rubric:

1. Navigate to the rubric as described in the previous section
2. Click **Copy**
3. Click **Edit**
4. Make changes as desired, including the title, and click **Save**
5. Depending on your role, you may see a screen to select other users who can view the new rubric

## Add a Rubric to an Open Response Item

You can attach rubrics to open response items.

To create an item with a rubric:

1. Roll your cursor over Assessment Admin and click **Create**
2. Click **Create an Item**
3. Click **Open Response**
4. Click **Rubric Lookup**
5. Use the filters to locate the desired rubric and click **Attach**

Note that any currently selected subject, grade range, or standard will be replaced with the rubric values.

6. Enter the item prompt

Question Content  
[Click here to add content.](#)

7. Select a point value, or values, if applicable
